Claims 1-14 are pending in this application.

Claims 7-12 remain withdrawn from further consideration as being directed to non-elected subject matter. Claims 1-6 and 13-14 will presently be examined.

Applicant is advised that the proper Markush language for listing alternative species is "selected **from the group consisting of ... and ....**" Claim 1 would be improved by adopting this language at line 4.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Relyveld et al. (US 4,350,686).

Relyveld et al. disclose aqueous extract obtained from pollens of phelum, rye, cockle, dactylis (column 2, line 46; column 5, lines 14-18), which is adsorbed on calcium phosphate gel (column 4, lines 35-43). See also column 4, lines 53-59. Diminution of reaction on the skin is disclosed (column 4, from line 64 to end).

Relyveld et al. clearly teach denaturing "allergens originated from ... pollens or plants" by applying an effective amount of calcium phosphate. Reactivity of the allergens on the skin is

Art Unit: 1616

diminished. Denaturing to some degree has therefore been achieved. The claims do not read on complete 10<sup>0</sup>% effective denaturing. The claims are thereby anticipated.

Claims 3, 6 and 13-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
